Premiere at SCHWEISSEN & SCHNEIDEN:

Young Innovative Companies from Germany Will Present Themselves Together

On September 16 - 21, 2013, SCHWEISSEN & SCHNEIDEN will once again become the global innovation showcase of the specialist world of joining technology. At Messe Essen, around 1,000 exhibitors from more than 40 nations will show their newest products, processes and services for joining, cutting and surfacing. In this respect, the 18th edition of the world's premier fair will also offer young innovative companies from Germany their own forum for the first time. Promoted by the Federal Ministry of Economic Affairs and Technology, eight start-up and hived-off enterprises will show their know-how in a compact form on one cooperative booth in Hall 9.

The exhibitors will come from the fields of laser technology, the development of semi-finished products, air filter technology as well as various specialist areas of welding technology. For example, the exhibits on display will include welding gap clips for root welding, air filter solutions for efficient production in metal processing as well as highly efficient, mobile lasers which can be utilised on ships or drilling rigs too. The portfolio of the young innovative companies will also encompass solutions for laser inscription, semi-finished products manufactured by means of hydrostatic rod pressing as well as the hiring-out of laser installations according to the needs.

Great Demand Amongst Young Innovative Companies

The new, efficient presentation possibility for start-up and hived-off enterprises at the world's premier SCHWEISSEN & SCHNEIDEN fair is meeting with a very good response. Even months before the beginning of the fair, Messe Essen has already doubled the exhibition area in Hall 9 to 86 square metres because of the great demand. Further places can still be occupied. There are promotion possibilities for interested companies: The Federal Ministry of Economic Affairs and Technology will bear up to 80 percent of the costs of constructing and renting the booth.
