FIRST EUROPEAN YOUNG WELDERS COMPETITION HAS SHOWCASED THE BEST TEAMS FROM EUROPE

The first edition of the WeldCup was a massive success, with teams working hard to be the first amongst their peers in the competition. For the participating youngsters it was also a great opportunity to meet other teams and share their overall experiences. Fourteen countries were represented with more than

20 organizations involved in making this a landmark to be followed up in future events. The 50 youngsters who have participated had a unique opportunity to meet, compete and also important to have fun and learn more about the future of their profession, which looks brighter than ever with the renewed focus on industrial production, where welding plays a key role. It is expected, given the excellent response, that this first edition has laid the groundwork for a European welders' competition, with the aim to reach a wider range of national and international players committed to participate.

As a side event, there was also a contest with the Chinese and German teams as well as a special team comprising the best European welders, which the European team won. We would like to thank all teams for their enthusiasm and congratulate them for the unique experience to be present at the Welding and Cutting Fair 2013, which we hope will leave a lasting impression and will contribute to their future as professionals who will always drive for excellence in their lives.

The winning team of Austria

2nd place team of Switzerland

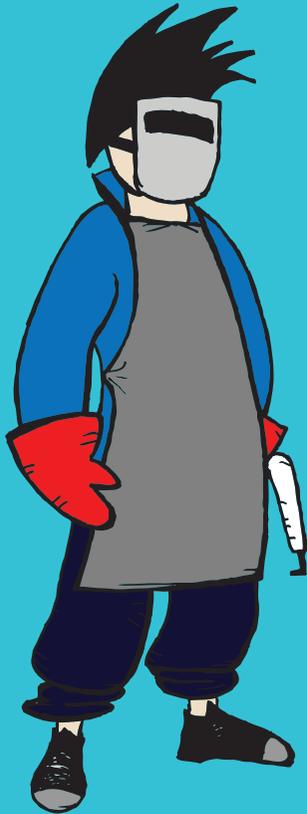

3rd place team of Germany

For this first edition, we would like to congratulate the winning team of Austria as well as the runner-ups from Switzerland and Germany, second and third.
