

ONE
SYSTEM

FORTY SIX 46
COUNTRIES

The **IAB** (International Authorisation Board) System have a three-fold orientation: personnel, companies and the international welding community.

The **IAB** is constantly working to develop the system it manages: the harmonised qualification and certification system for personnel and the certification system for companies, and adapt them both to technological advances and market needs.

The **IAB** works continuously towards the interests of the international welding community and its development, via its members worldwide. By providing certified welding personnel with coordination responsibilities and qualified and skilled personnel at all levels, and by developing a harmonised scheme for company quality certification according to ISO 3834, **IAB responds to industry needs.**
